DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, claims 1-4, pertaining to a method of conducting a second type of halo implant into less than all peripheral MOSFETs;

Species 2, claims 5-15, pertaining to a method including a common masking and implant step to impart three different threshold voltages;

Species 3, claims 16-17, pertaining to a method including imparting three different threshold voltages for devices forming memory access;

Species 4, claims 18-27, pertaining to a method of forming n-type transistors in a peripheral area, partially masking the devices and conducting a halo implant;

Species 5, claims 28-36, pertaining to a method of forming n-type devices, masking their source/drain regions and halo implanting into the source/drains;

Species 6, claims 37-40, pertaining to forming NMOS devices, exposing-covering-then partially exposing portions of the device;

Species 7, claims 41-45, pertaining to improving DRAM storage cell retention through common masking and threshold voltage manipulation;

Species 8, claims 46-49, pertaining to improving DRAM storage cell retention by forming different junction structures.

Art Unit: 2813

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
